Lush, green parks seen in some of the world's best cities, such as Central Park, Manhattan, New York, will soon become a reality for Mumbaikars, too. Have you ever imagined strolling in a park that has splendid design elements in their walkways and landscaped gardens to make it a delight to go out for a walk every morning? Or the open-air vistas and avenues that resemble the makings of a designer park? The upcoming township joint venture project by Narang Realty and the Wadhwa Group, appropriately called Courtyard, have built a world-class Community Park at Pokhran Road No. 2, Thane (W). The Community Park, which has the beautiful Yeoor hills as a backdrop is open for public and built as a green oasis amongst the concrete jungle around. If you're looking for quietude, well-designed landscape, greenery and facilities in which to spend time reading or lazing around, this is the place to go to.

SCHEMATIC LAYOUT WITH SPECIAL DESIGN ELEMENTS

The Community Park has all the makings of innovative design that could be the first-of-its-kind in many respects. The landscaping has been done by architects from New Zealand, who have integrated the design of the park with utility, to make it aesthetically invigorating. The uniqueness extends to the fact that it has some of the most sought-after lifestyle choices like a Yoga Zone, Reflexology

Path, Kids' Play Zone and Jogging Track.

The innovation in this project design is reflected in various social amenities here. The Sunken Amphitheatre provides wide open spaces for social gatherings. The tree canopy is apt for interactive games while the raised inclined planter walls are backrest for seats. There is also an outdoor gym to workout in the fresh air.

For those wanting to spend leisure time, the ground surfaces are made into potential design elements. The walkways are elevated, making the daily stroll better for older people while kids can play on the slides and the swings. There is ample seating area to let you catch your breath while walking or jogging or if you want to sit and read a book or listen to music. Textured paths and seats have been earmarked for senior citizens. There is also a serene water feature and deer sculptures at many spots around the park.

LOVELY LIGHTING

When the day draws to a close, you can't miss the elegant lighting that fills the entire Community Park with colourful fluorescence and shades. The lighting concepts here also complement the saturation of hues in tropical flowers and leaves. Among many trees on the park's walk-

Large open spaces for events

A play area for kids, too

Take a walk or just sit down and read a book among the greenery

ways are Acalyphahispida, Alpinia purpurata, Balericristata, Phyllistiscoplopndrium, Neem and more. The promenade style stretches, elevated walkover bridges, stylised seating areas, healthy canopy of trees, fabulous contemporary design elements at vantage points, streams and open air theatre for people, all point to a whole new lifestyle that many in this metropolis would find enchanting and conforming to the new generation of living.

Anniversary Celebration

Ways to maintain costly watches

Collections/Getty Images

STORE IT RIGHT

Store your watch in a dry, temperature-controlled environment. Humidity and dust are bad for them as it may destroy the dials. Keep them away from harsh lights since they may damage colour of the dials.

WEAR THEM TO SUIT THE OCCASION

Keep your vintage watches for wearing on special occasions. It will reduce the wear and tear. Check the weather before wearing watches with leather straps.

SERVICE REGULARLY

Service your watches once every few years. Those which you wear regularly, will have to serviced more often. For costly watches,

there are certified technicians appointed by the brands, who can carry out the service with precision and care.

HANDLE CRYSTALS WITH CARE

If you have original crystals in the watch, replace them in case of breakage or chipping but ask your watch technician to return you the original crystal since it can add value to the watch if you wish to sell it at a later date.

INSURE THEM

Since watches can be easily stolen, it's better to insure them. You have to write down the serial numbers and keep photographs of your watches so that even if it's lost, tracing them becomes easy.
